

```
import java.util.Scanner;
class Main
{
    public static void main(String[] args)
    {
        Scanner input=new Scanner(System.in);
        int num=input.nextInt();
        int sum=0;
        int r;
        for(int i=1;i<=num;i++)
        {
            r=num%10;
            sum=sum+r;
            num=num/10;
        }
        System.out.println(sum);
    }
}
```
