

```
import java.util.Scanner;
class Main
{
    public static void main(String[] args)
    {
        Scanner input=new Scanner(System.in);
        System.out.println("Enter first string");
        String str1=input.next();
        System.out.println("Enter second string");
        String str2=input.next();
        String concatenate=str1.concat(str2);
        System.out.println(concatenate);
    }
}
```
