

```
import java.util.Scanner;
class Main
{
    public static void main(String[] args)
    {
        Scanner input=new Scanner(System.in);
        // System.out.println("Enter the number u want to check:");
        int num=input.nextInt();
        if(num>0)
        {
            System.out.println("Positive number");
        }
        else if(num<0)
        {
            System.out.println("Negative number");
        }
        else
        {
            System.out.println("Neither positive nor negative");
        }
    }
}
```
