

```
import java.util.Scanner;
class Main
{
    public static void main(String[] args)
    {
        Scanner input=new Scanner(System.in);
        int radius=input.nextInt();
        double pi=3.14;
        double area=pi*radius*radius;
        System.out.println(area);
    }
}
```
