```java
import java.util.Scanner;
class Main
{
    public static void main(String[] args)
    {
        Scanner input=new Scanner(System.in);
        int num=input.nextInt();
        int factors=1;
        int r;
        for(int i=1;i<=num;i++)
        {
            r=num%i;
            if(r==0)
            {
                System.out.print(i+",");
            }
        }
    }
}
```
