```java
import java.util.Scanner;
class Main
{
    public static void main(String[] args)
    {
        Scanner input=new Scanner(System.in);
        String str=input.nextLine();
        int[] freq=new int[str.length()];
        char ch[]=str.toCharArray();
        for(int i=0;i<str.length();i++)
        {
            freq[i]=1;
            for(int j=i+1;j<str.length();j++)
            {
                if(ch[i]==ch[j])
                {
                    freq[i]++;
                    ch[j]='0';
                }
            }
        }
        for(int i=0;i<freq.length;i++)
        {
            if(ch[i]!=' '&&ch[i]!='0')
            System.out.println("The frequency of "+ch[i]+" is "+freq[i]);
        }
    }
}
```
