```java
{
    public static void main(String[] args)
    {
        Scanner input=new Scanner(System.in);
        int test=input.nextInt();
        int k;
        int sum=0,sum1=0;
        for(int i=0;i<test;i++)
        {
            //int sum=0,sum1=0;
            for(int j=0;j<7;j++)
            {
                k=input.nextInt();
                if(k==1)
                {
                    sum1++;
                }
                else
                {
                    sum++;
                }
            }
            if(sum>=sum1)
            {
                System.out.println("No");
            }
            else
            {
                System.out.println("Yes");
            }
        }
    }
}
```
