```java
import java.util.Scanner;
class CheckAlphaOrNot
{
    public static void main(String[] args)
    {
        Scanner input=new Scanner(System.in);
        System.out.println("Enter the Character:");
        char ch=input.next().charAt(0);
        if((ch>='A'&&ch<='Z')||(ch>='a'&&ch<='z'))
        {
            System.out.println("Alphabet");
        }
        else
        {
            System.out.println("Not an alphabet");
        }
    }
}
```
