```java
import java.util.Scanner;
class Main
{
    public static void main(String[] args)
    {
        int len=0;
        Scanner input=new Scanner(System.in);
        String str=input.next();
        for(char c:str.toCharArray())
        {
            len++;
        }
        System.out.println(len);
    }
}
```
